

Mohak Srivastava

New Delhi, India | +91 7706022562 | mohaksrivastava2913@outlook.com | [Linkedin](#)

Professional Summary

Results-oriented Data Scientist with over eight years of experience, specialising in the application of machine learning, Natural Language Processing (NLP), and Generative AI to address multifaceted business challenges. Demonstrated success in developing and deploying comprehensive data solutions, including credit scoring models, risk management systems, advanced LLM-based chatbots, and automated thematic analysis pipelines. Skilled at transforming data-driven insights into actionable strategies that foster organisational growth, promote financial inclusion, and enhance operational efficiency.

Skills

- **Machine Learning:** Proficient in supervised learning techniques (classification and regression), unsupervised learning (clustering, principal component analysis), recommendation systems, predictive modelling, credit scoring, and risk analytics.
- **NLP & Generative AI:** Experienced in Retrieval-Augmented Generation (RAG), function calling, prompt engineering, text mining, and thematic analysis.
- **Data Analytics & Visualization:** Skilled in data quality management, geospatial analysis (GIS), statistical analysis, and dashboard development.
- **Tools & Technologies:** Proficient in MS Excel, SQL, R, Python, Apache Superset, Tableau, Power BI, and MS Access.
- **Domain Knowledge:** Expertise in financial inclusion, fintech, risk management, gender studies, and market research.

Professional Experience

Manager | MSC India

New Delhi, India | 2023 – Present

- Designed and implemented a comprehensive application-level data quality assurance and funnel analytics framework for a digital MSME lending platform. This initiative diagnosed stage-wise leakage and data integrity issues, enabling evidence-based redesign of credit processes and underwriting workflows, with a focus on increasing the number of women primary loan borrowers.
- Designed and developed a credit screening tool for banking correspondent (BC) agents for an NBFC's revolving loan product, supporting improved and scalable credit decision-making. Led the analytics and modelling workstream, contributing to feature engineering, model development, validation, and stability assessment.

- Led the development of a large language model (LLM)-based chatbot, facilitating queries on extensive development data repositories. Integrated text-to-code optimisation and function calling capabilities to provide actionable insights to non-technical users.
- Architected and executed a two-phase LLM pipeline employing Retrieval-Augmented Generation (RAG), automating the thematic analysis of qualitative interview data and markedly reducing reporting turnaround times.
- Developed interactive dashboards for UIDAI's (Aadhaar) data initiative, supporting policymakers in data-driven governance.
- Engineered complete data pipelines for the Department of Financial Services (DFS), encompassing data collection training, quality control, and Tableau dashboard creation, thereby strengthening financial inclusion initiatives at local government levels.
- Oversaw data quality assurance and conducted analysis for a study tracking financial transactions of approximately 500 Micro and Small Enterprises (MSEs) in Bangladesh, contributing to the development of gender-inclusive financial products.

Data Scientist | Kincentric

New Delhi, India | 2022 – 2023

- Utilised supervised machine learning models to analyse psychological assessment scores for a global conglomerate, delivering data-driven recommendations to support leadership development and succession planning.
- Designed and developed a relational database in MS Access, streamlining the organisation's project repository and improving operational efficiency and project implementation.

Data Scientist | Squareyards

Mumbai, India | 2021 – 2022

- Applied text mining techniques to extract key features from unstructured real estate data.
- Developed and deployed predictive models to forecast property valuations and identify high-potential investment opportunities, directly supporting data-driven acquisition strategies.
- Utilised supervised machine learning models to analyse psychological assessment scores for a global conglomerate, providing recommendations for leadership development and succession planning.
- Designed and developed a relational database in MS Access to streamline project repository management, enhancing operational efficiency and project execution.

Assistant Manager | MSC India

New Delhi, India | 2020 – 2021

- Provided technical assistance and developed data strategies for early-stage fintech startups within the JPMC Financial Inclusion Lab.
- Engineered, developed, and validated classification models to optimise organisational recruitment practices and devised alternative credit scoring models for multiple startups.

- Applied unsupervised learning methods to identify customer payment profiles and created data mining algorithms for extracting actionable insights from unstructured datasets.

Associate / Independent Consultant | MSC India

New Delhi, India | 2017 – 2020

- Conducted geospatial analysis using GIS mapping to identify and prioritise agent locations for Airtel Payments Bank across eight aspirational districts.
- Managed quantitative assessment studies, performed data analysis, and contributed to the development of strategic roadmaps for creative industries in Uttar Pradesh as part of a World Bank project.
- Performed gender data analytics and contributed to the co-design of a policy framework for digital financial services and women's financial inclusion for the Alliance for Financial Inclusion.

Education

Post Graduate Programme in Business Analytics and Business Intelligence *Great Lakes Institute of Management | 2020*

Bachelor of Technology *SRM Institute of Science and Technology, Chennai | 2019*
